Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

REASONS FOR ALLOWANCE

1. Claims 7-16 are considered allowable over the cited prior art for the following reasons:

"HortPlus Quick Measure Penetrometer System" User Manual and Fact Sheet discloses a computerized intrusive plunger fruit tester and corresponding method of operation wherein fruit is placed on a centering plate underneath a cylindrical penetrating plunger that is repeatedly driven into the fruit to a correct depth at a constant velocity by a motor. HortPlus also discloses a load cell (i.e. stress block) sensing the pressure resisting plunger motion into the fruit toward the centering plate and transmitting these measurements to a computer that converts the pressure data into fruit firmness and maturity information for display, using corresponding software. U.S. Patent No. 4,884,696 to Peleg teaches a method and apparatus for automatically inspecting and classifying different objects, specifically, measuring visco-elastic and visco-plastic properties of fruits.

None of the cited prior art, however, teaches or suggests, in combination with the other claimed limitations for determining the maturation state and condition of a fruit, classifying a soft tissue fruit into three concentric zones consisting of a first zone extending spacedly inward from the fruit periphery, a third zone including the fruit core, and a second zone bounded by the first and third zones, and mechanically moving an elongate plunger into the fruit through at least one data point in each of the said three zones to determine a plunger position relative to the fruit surface at

each of the data points and determining data relating to the visco-elastic properties of the fruit at each data point.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. West whose telephone number is (703)308-1309. The examiner can normally be reached on Monday through Friday, 8:00-4:30.
